1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Werner.

Werner discloses the process of blending 0.01-10 wt. % (page 11, line 5) of preferably octadecanol (page 11, line 22) with molten polyurethane thermoplastic. He shows the thermoplastic made from polyether polyols (page 5), polybutylene adipate polyol (bottom page 7), and polycarbonate polyols (page 8) reacted with diphenylmethane diisocyanate (page 9, line 13) and chain extenders (page 9) at NCO/OH ratios of 0.95-1.1/1 (page 2, line 29).

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Werner.

5. Werner discloses the invention of the claims (see above rejection). He differs from claim 13 by showing polybutylene adipate polyol among a list of other polyols that can be used for the process of his invention.

Art Unit: 1711

6. It would have been obvious to one of ordinary skill in the art at the time the invention was made to choose polybutylene adipate because Werner teaches that it can be used equivalently to any other of the listed polyols.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
